

JOHNFORD®

Double Column Machining Centers

DMC-4000 / SDMC-6000

Fixed / Moving Column, 5-Axis / 5-Face Series
Order-made

Double Column Machining Cent

Mightiest of Them All

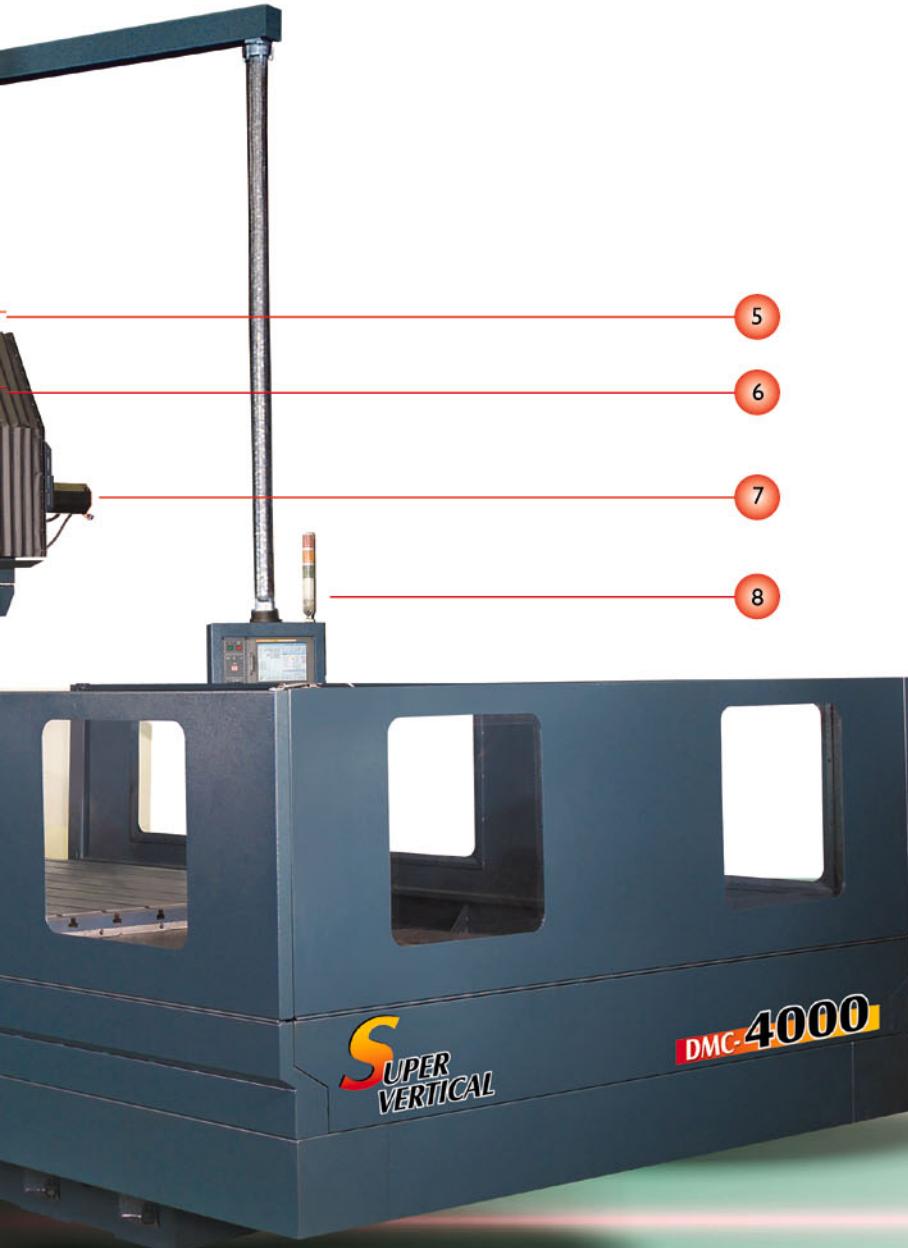

DMC-4000

Johnford DMC's are the heaviest, best built bridge mills on the planet. These are heavy machines built to last while delivering heavy cutting, high accuracy, and high speed. Check out these specs:

DMC-4000: 4000 x 2800 x 800 mm, 66200 kg
(157.5" x 110.2" x 31.5", 145800 lb)
4000 x 2800 x 1066 mm, 64200 kg
(157.5" x 110.2" x 42", 141400 lb)

When the machine is equipped with the 5-axis or 5-face heads, the machine structure is changed.

ters

1 Twin hydraulic cylinders balance the massive headstock.

2 Large diameter spindle is driven by a 26 kW (37 kW Opt.) spindle motor and 2 speed ZF helical transmission for heavy cutting. The spindle cartridge and the gearbox have their own separate oil chillers for the best thermal stability possible. Plus, it generates 662 N-m (488 lb.ft) of torque at only 375 rpm for 26 kW and 1472 N-m(1086 lb.ft) at only 240 rpm for 37 kW. Multi-axes heads are optional.

3 Johnford's ATC system is the best available. The standard ATC is 40 tools with options of 60 tools or more. The ATC is self contained and stands alone. The fixed pot system always puts the tool back in the pocket it came from. 200 mm (8") shell mills are easily accommodated in the magazine.

4 Massive one piece base castings. All major machine components are made from high quality meehanite cast iron.

5 The largest bridge and saddle in the industry! The cross rail is 1332 mm (52.4") tall x 1213 mm (47.8") deep. The saddle is 1250 mm (49.2") tall and 1200 mm (47.2") wide and holds onto a full 1250 mm (49.2") of the Z axis head for the ultimate in stability and rigidity. The massive Y axis ways are offset 250 mm (10") for stability and accuracy.

6 Ballscrews are the largest in the industry 80 mm (3.1") in the X and Y and 63 mm (2.5") in the Z. They are pretensioned to eliminate thermal growth.

7 Servo motors are the largest in the industry too! 6 kW on X and Y with 2:1 gear reduction drives for the most axis thrust available.

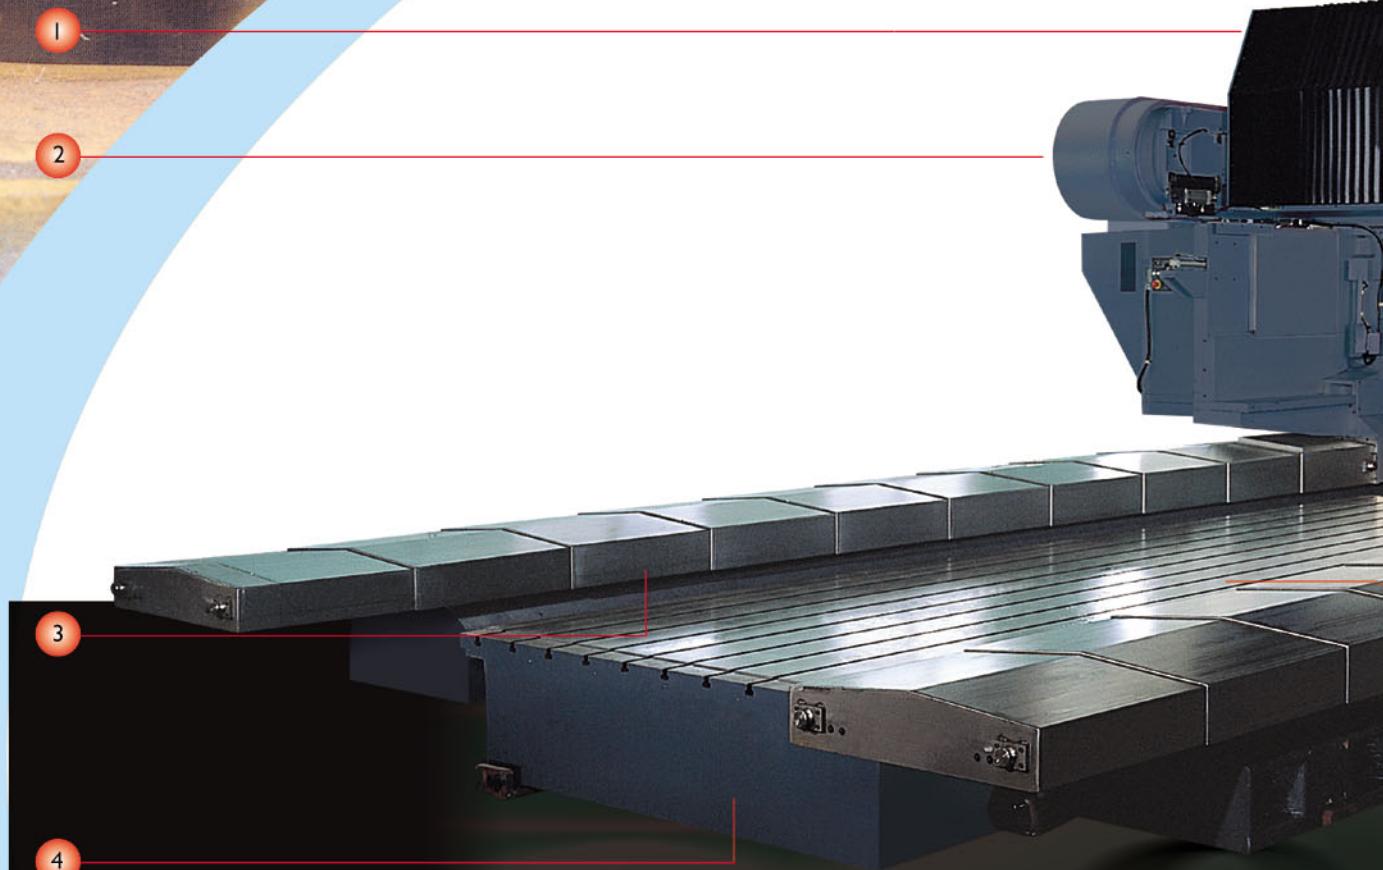

8 Fanuc 18i MB/0i MC/21i MB controls are used for reliable service and state-of-the-art technology.

Super Advanced Features

- Large diameter spindle with big power
- Twin hydraulic cylinders for balance
- The largest bridge and saddle in the industry
- The largest ballscrews in the industry
- The largest servo motors in the industry
- Twin chip removal systems
- Massive one piece castings
- Excellent ATC system
- The largest order-made machine available

Double Column Machining Cent

SDMC-6000

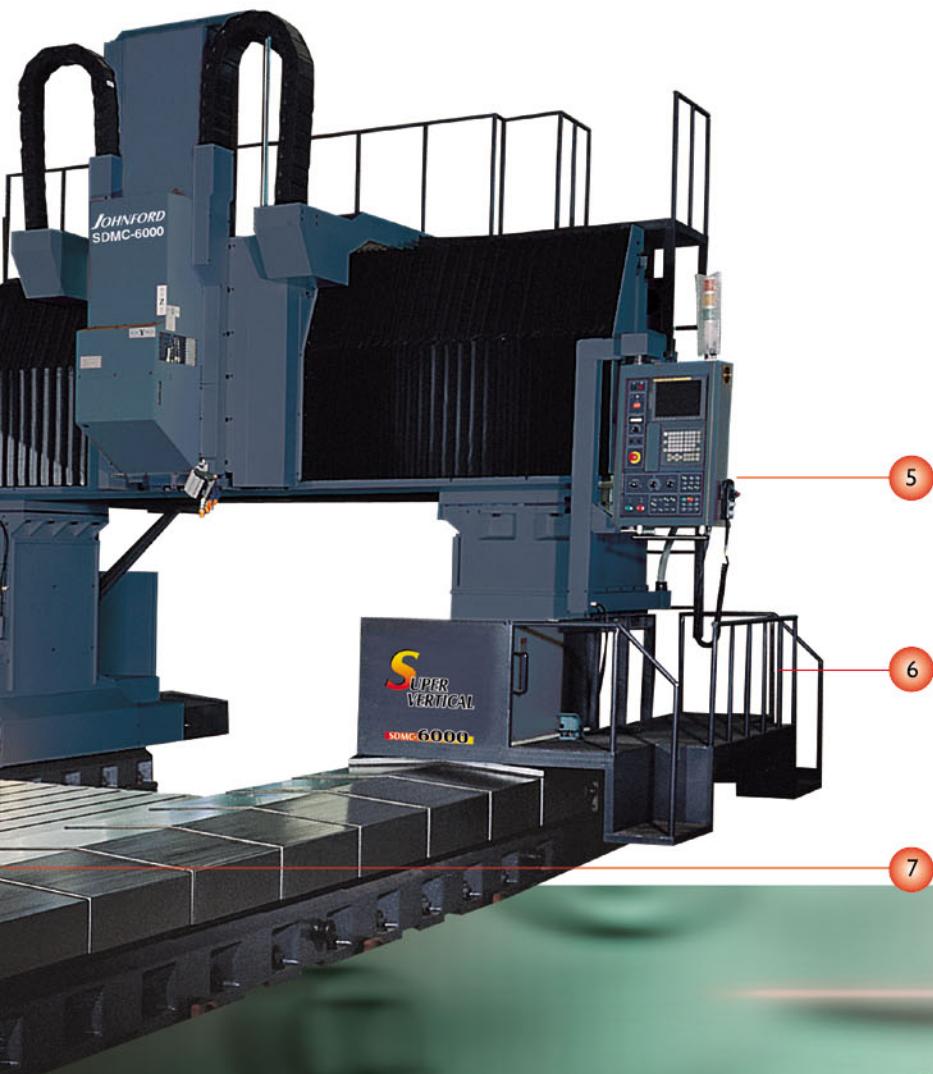

Johnford SDMC's are built for the really big jobs. Starting with X travels of 5000 mm (196.9"), we can build it to 30000 mm (1181.1") or more. When the machine is equipped with the 5-axis or 5-face heads, the machine structure is changed.

How Big Is Big Enough for

Super Advanced Features

- Large diameter spindle with big power
- Twin hydraulic cylinders for balance
- The largest bridge and saddle in the industry
- The largest ballscrews in the industry
- The largest servo motors in the industry
- Twin chip removal systems
- Massive one piece castings
- Excellent ATC system
- The largest order-made machine available

eters (Rail Type)

1

Same massive bridge/saddle/head assembly as our DMC series.

2

Same excellent ATC system used on our DMC's. We mount the ATC to the column as the standard system to save ATC time.

3

Twin 80 mm (3.1") ballscrews are used on the X-axis in 11 meters. One ballscrew is under each column. The ballscrews are synchronized in a master/slave system by the Fanuc CNC control system. Due to the length of the ballscrews, the ballscrews remain stationary while the ball nuts are rotated by the powerful servo motors. When the X-axis length of machine is over 11 meters, we will use twin preloaded rack & pinion drive systems to move the X-axis of machine for standard. Because the ballscrews will have more cost made and difficulty in manufacturing.

4

Efficient chip removal system consisting of 2 screw type conveyors and a caterpillar type conveyor with 1220 mm (48") discharge height is standard.

5

Fanuc 18i MB control is standard

6

Operator rides along on platform attached to column.

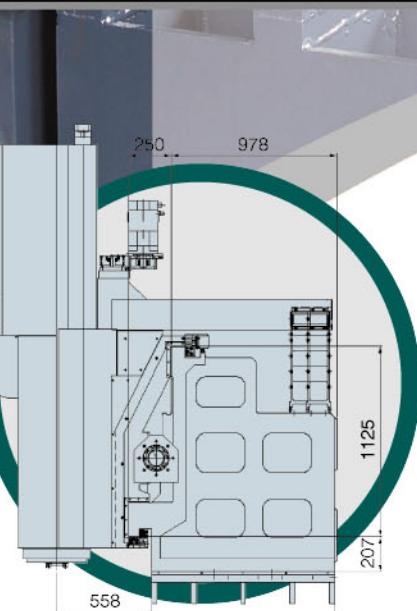

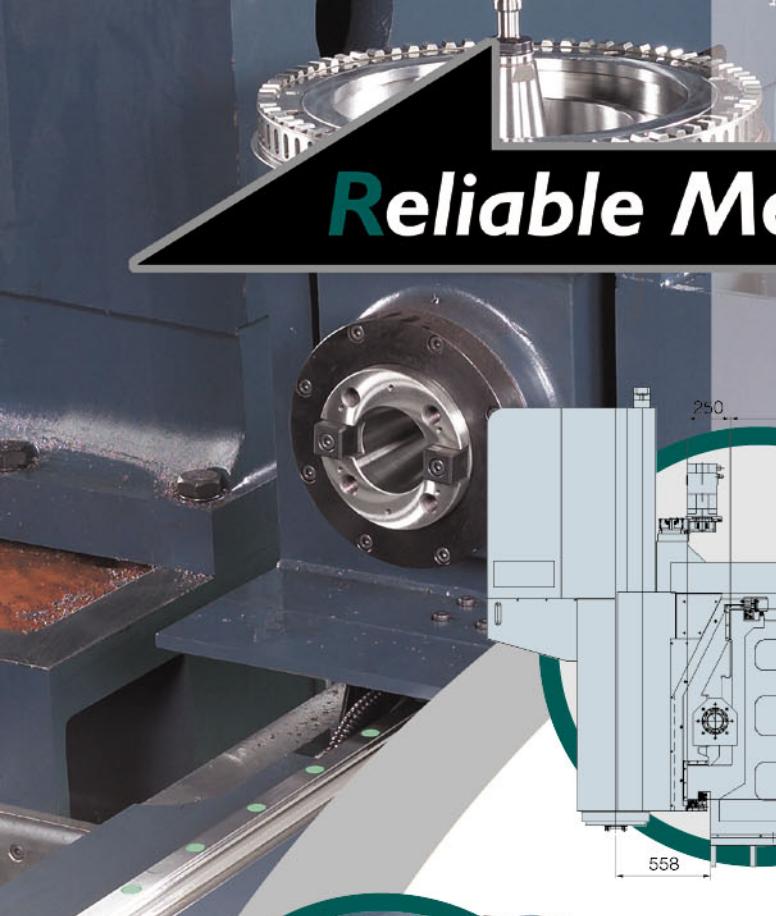

7

Moving column/stationary table design can handle virtually unlimited table loads and conserves valuable floor space.

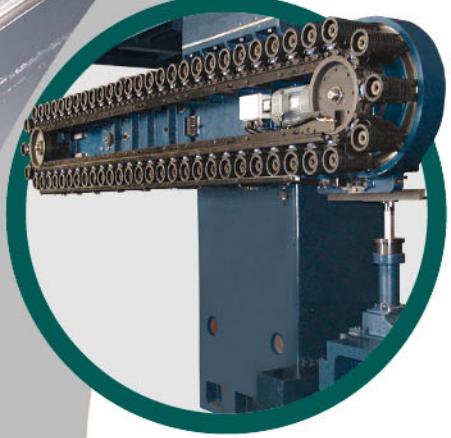

You?

Reliable Mechanical Design

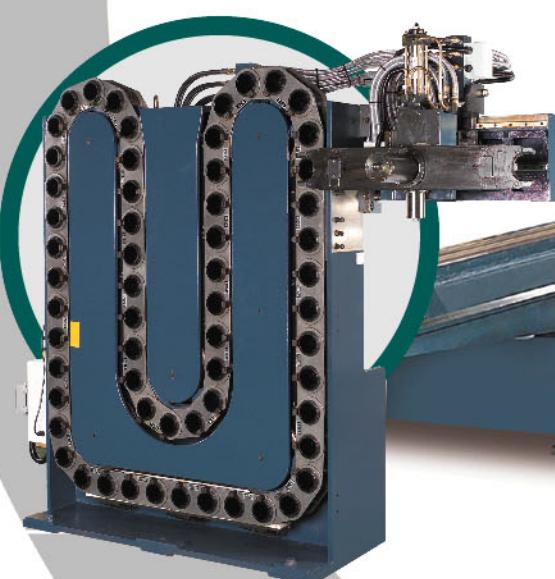

- Both Y & Z use hardened & ground box ways with turtite-B.
- Box structure ram ensures working stability and accuracy.
- Zero overhang on Z travel.
- Double support hydraulic counter balances provide high stability.

Automatic Tool Changer

- Reliable automatic tool changer provides 7 seconds tool change time.
- Automatic tool change arm is supported by linear ways to ensure rapid & smooth traverse.
- Bi-directional tool changer without interference. 40 tools automatic tool changer is standard. 60 tools or more are optional.

■ All data subject to change without notice.

■ All the specifications are listed with the FANUC CNC system.

Standard Accessories:

1. Coolant system
2. Spindle air blast
3. Heat exchanger
4. Full enclosure
5. Twin screw-type chip conveyors
6. A chain-type chip conveyor
7. Operation box
8. Tools, tool box and various manuals
9. Rigid tapping
10. Spindle oil cooler
11. FANUC 0i-MC controller (for DMC-series)
12. FANUC 18i-MB controller (for SDMC-series)

Optional Accessories:

1. Contact tool setting system (Renishaw TS-27R) or BULM NT-A2 / NT-A3
2. High pressure coolant thru tool tip
3. High pressure coolant thru spindle
4. 60, 80, 120 tools
5. Workpiece measuring system (Renishaw OMP-60) or BULM TC-50
6. Z travel 1066mm.
7. 5-Face head
8. 5-Axis head
9. 90° milling head
10. Multiangular milling head
11. Twin spindle-2H
12. Manual guide i / 0i (0/MC) ; Manual guide i (18i/MB / 21i/MB)

5-Axis and 5-Face CNC Control Specs

O: Std. △: Opt. -: Nil

Item	Function	Specifications	5-FACE	
			18/MB	18/MB5
Control axes	Standard number of control axes	axes	4	5
	No. of simultaneously controlled axes	axes	3	5
Input commands	Least detection increment	1μ	1μ	1μ
	Least programmable increment	1μ	1μ	1μ
	Inch/metric conversion	G20/G21	0	0
	Absolute/incremental command	G90/G91	0	0
	Input buffer	word/characters	128	128
	Pre-read buffer (No.of block)	block	180	600
	ISO/EIA automatic identification		0	0
	RS232-C interface		0	0
Interpolation	Positioning (interpolation)	G00	0	0
	Linear interpolation	G01	0	0
	Circular interpolation	G02/G03	0	0
	Helical interpolation		△	△
Program	Memory capacity		160 M	160 M
	No. of programs stored		64	64
	Background editing		0	0
Spindle functions	S code output 4-digit BCD-binary	S4BCD	0	0
	Rigid tapping		0	0
	Spindle rate	%	200	200
Feed	Lock-ahead Acc/Dcc		0	0
	Bell-shaped Acc/Dcc		0	0
	Rapid traverse rate	low25%,50%,100%	0	0
	Cutting feed rate		0-200%	0-200%
	Handle feed rate	x1,x10,x100	0	0
Miscellaneous function	M-code	M2(BCD)	0	0
Coordinate system	Automatic coordinate system setting		0	0
	Machine coordinate system		0	0
	Work coordinate system	G54-G59	0	0
	Coordinate system setting	G92	0	0
	Manual reference point return		0	0
	Automatic reference point return	G28/G29	0	0
	2nd reference point return	G30	0	0
	Reference point return verify	G27	0	0
Tool function	Addition work-coordinate system(48set)		0	0
	Tool command	T2 BCD	0	0
	Tool length offset	G43/G44/G49	0	0
	Cutter compensation C	G40/G41/G42	0	0
	Number of offset sets		400	400
	Tool length compensation Tool axis direction		-	0
Operation	3D cutter compensation		-	0
	Single block		0	0
	Block skip		0	0
	Dry run		0	0
	Machine lock		0	0
	Option stop	M01	0	0
	Miscellaneous function lock	M.S.T.lock	0	0
	Manual Absolute ON/OFF		0	0
Programming support function	PLC switch		0	0
	Manual handle interruption		0	0
	Tool direction handle feed		-	0
	Sub-program control	M98, M99	0	0
	Corner chamfering/corner rounding		△	△
	Canned cycle for drilling	G80-G89	0	0
	Automatic corner override		△	△
	User macro		0	0
	No. of variable command sets		500	100
	Backlash compensation		0	0
Measurement function	Memory-type pitch error compensation		0	0
	Coordinate system rotation	G68/G69	0	0
	Scaling	G50/G51	0	0
	Polar coordinate command	G15/G16	0	0
	3D coordinate system conversion		0	0
	Programming data input	G10	0	0
	Skip function		0	0
	Tool length automatic measurement		△	△
	Emergency stop		0	0
Safe protect	Travel protected		0	0
	Program protected		0	0
	CRT		10.4"	10.4"
Other	Data server		△	0
	HPCC by 64bit RISC		△	0
	Run hour display and parts count		0	0
	Graphic display		0	0
	Conversational programming with graphic function	Manual guide	△	△
	Language	English	0	0
	Chinese, French, German, Italian, Spanish		0	0
